

## EDUCATION ASSOCIATION

H-CAP Education Association is a network of labor management training funds and partnerships across the country formed by healthcare unions and employers to build an infrastructure for high-quality workforce training. H-CAP Education Association comprises industry-driven, labor-management, and labor-based training organizations in 16 states plus Washington, DC, representing 550,000 workers.

H-CAP EA is a non-profit 501c3 that supports work across sectors of the healthcare industry. H-CAP EA supports leadership and staff development for Funds and Training organizations, and is able to support the work of partner funds in areas including apprenticeships, language classes for English Language Learners, and exam preparation.

H-CAP EA is committed to provide workplace skills and career pathways and bring greater equity to the healthcare professions. H-CAP EA works with our partners to disseminate best practices that support education, skills enhancement, and career mobility for healthcare workers, develop solutions to emerging issues, and provide program development and evaluation services to collaborating partners.

H-CAP EA also provides program development and research support on successful programs around the country and to increase knowledge and share best practices of labor/management efforts on training in healthcare. H-CAP EA's efforts define policy initiatives that support joint training and incumbent worker career pathways.

In an effort to continue to provide support to our partners during the unprecedented healthcare and humanitarian COVID-19 crisis, H-CAP EA continues to compile resources to serve frontline caregivers.

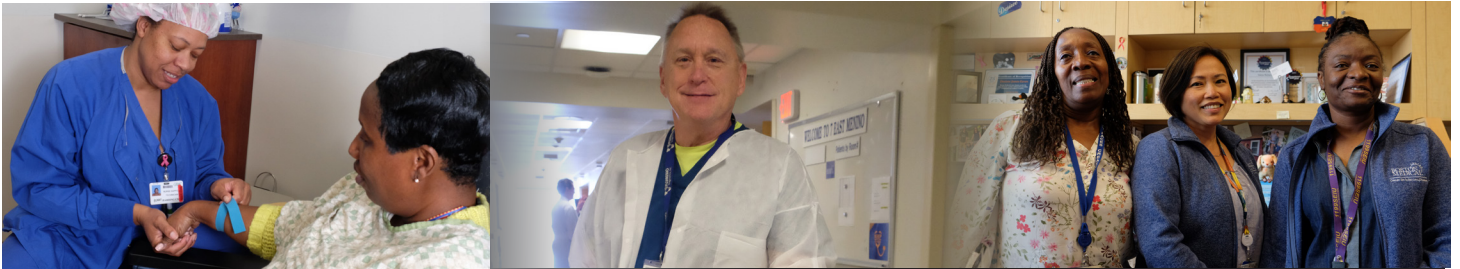

H-CAP EA is governed by directors of partner labor management training funds, with an advisory committee composed of training fund representatives, with representation across all sectors of the healthcare industry – from hospitals and health systems to nursing homes, home care and ambulatory and community-based care.
